## Siti amici

Lago Verde was once a simple healthy farmland which has now been transformed into a comfortable lodging. Surrounded by green pasture and beautiful countryside, this recently constructed place makes use of local stone, wood, old style ceramics, and wrought iron to hark back to the old times.

The small town of Alia, a typical picturesque countryside village with earth colours and narrow winding streets, can be admired from the large terraces of Lago Verde. Situated between three main centres -Palermo, Agrigento and Cefalu – Lago Verde is ideal as a base to discover the many faces of the Palermitan province. Although little known these past cultures are certainly no less fascinating. The contrasting scenarios stretch from the Cefalu seaside, the hills of the Madonnie and the feudal castles standing testimony to the history of our interland.
